

deCREDeucation

The following slides present an overview of CM8s ideas for the website.

Goals and Objectives

- The Go-to community resource for charts, data and research.
- An attraction point for researchers, on-chain analysis and traders, big and small.
- Of value and quality that it get shared in snip and link format throughout social channels
- Be a concise and accurate tool which helps people learn and feel empowered to promote, defend and debate Decred fundamentals.

Design Requirements

- Open Source for community input and review
- Modular design for including new charts – there will be many so this part is key
- Dual Language support (Eng and ES to start)
- Dark/Light mode
- Compliment <https://explorer.dcrdata.org/>

Examples

Liked components of example sites for reference

- <https://bitcoin-only.com/> - Like the tile format and intuitive reference
- <https://www.lookintobitcoin.com/> - Charts and descriptions
- <http://charts.woobull.com/> - Charts and descriptions
- <https://studio.glassnode.com/> - dashboards + categories of charts
- <https://digitalik.net/btc/> - Page layout for charts
- <https://frankbraun.org/> - Cypher-punk minimalist style

Primary Pages

- Homepage
 - Design/UI to come up with a concept (maybe featured chart, dashboard of metrics, latest research paper etc)
- Charts
 - Three categories (Pricing Models, Oscillators and Performance)
 - Blurb for each metric under the chart w/ links
 - More detailed research piece linked to associated research page
- Research – curated research papers, content and directory
 - Topics (Valuation, Indicators, performance, security, governance)
 - Blog and Newsletter (future)
- Videos – embed video explainers and on-chain classes
 - Example here and [here](#)
